

THE SUPERIOR™ GAS DETECTOR **FEATURES “BLACK BOX TECHNOLOGY”**

Chemical Injection Technologies, Inc., a world leader in water and wastewater treatment and an ISO 9001:2000 certified company, has developed the SUPERIOR™ Gas Detector, featuring state-of-the-art “black box technology.”

With this technology built in, the

SUPERIOR™ Gas Detector detects and records chlorine, sulfur dioxide, ammonia and ozone gasses. Along with black box technology, password protection provides SUPERIOR security.

The high capacity memory event alarm log records up to 256 events, along with the date and time of each event. And, the log can be downloaded from the optional serial port.

Howard Specker, president of Chemical Injection Technologies, Inc., said, “The SUPERIOR™ Gas Detector offers SUPERIOR monitoring at levels far below the threshold of human awareness. A screeching 95 decibel internal alarm horn alerts personnel, with the sensor recovering quickly when the gas has cleared.”

The SUPERIOR™ Gas Detector is designed for use in numerous areas, such as wastewater treatment plants, water purification plants, swimming pools, cooling towers – air scrubbers, food and beverage processing, and chemical processing. The unit can be placed up to 1,000 feet (305 meters) away in a monitored environment.

Since 1992, Chemical Injection Technologies, Inc. has been setting the standard for excellence and has been providing state-of-the-art solutions for water purification needs, including the disinfection of water for drinking, industrial process, chilling, washdown, and sanitation; controlling algae and slime in cooling tower and drip irrigation systems and swimming pools; and cleaning and disinfection of a variety of foods with advanced SUPERIOR-brand Gas Chlorinators, Sulfonators and Ammoniators. SUPERIOR products are safer, economical, and user friendly. Recognized as a world leader in water and wastewater treatment and an ISO certified company, Chemical Injection Technologies, Inc. is located at 4796 S. U.S. Highway 1, Fort Pierce, FL 34982; Tel: 772-461-0666; Fax: 772-460-1847. You can e-mail the company at chlorine@gate.net, or visit their website at www.chlorinators.com .
